4-5pm  
Bundaberg East SS  
(Ambrose Hall)

Individual or Group Projects  
Use any type of robot  
Code movement and actions  
Non-competitive ... just fun!

---

# The Natural World!

---

Let your imagination run 'wild' by designing and creating robots and/or Lego creations that fit the theme of 'The Natural World!' Ideas could include:

- animals
- plants
- natural disaster simulations
- geographic features
- dioramas
- and more ...

This non-competitive, free event is designed for children of all ages to show off/share their ideas with children and parents from the local area. Projects can include static and/or moving builds, props and backgrounds to support their creation. Projects can be as simple as a single build or as complex as creating a scene/performance.

Registered individuals/teams will be assigned a space in the hall to set up their projects. Spectators will be welcome to wander around to see all of the projects and talk to their creators.
